

SHOVA PANDEY

Frontend Developer Intern

Kathmandu, Nepal | shovap33@gmail.com | github.com/shova10 | linkedin.com/in/shovapandey-16b982260 | portfolio-shova.vercel.app

SUMMARY

Final-year Bachelor of Information Technology (BIT) student with hands-on experience building modular, responsive, and data-driven user interfaces in React., including REST API integration, role-based authentication, and interactive data visualization using Leaflet and Recharts. Proven ability to own frontend development independently within a small team environment. Seeking a Frontend Developer Internship to contribute production-ready code and grow alongside experienced engineering teams.

TECHNICAL SKILLS

Core: JavaScript (ES6+), HTML5, CSS3, React.js, Vite, React Router v6, Tailwind CSS, TypeScript

State and Data: Zustand, Context API, React Hooks, Axios (interceptors, token refresh), REST API integration

Visualization and Maps: Recharts, Leaflet.js, React-Leaflet

Tools and Workflow: Git and GitHub (multi-remote workflows), Vercel, Postman, Chrome DevTools, Jira, Figma (basic)

Backend Exposure: Django REST Framework (API integration and consumption), JWT authentication, SQL

PROJECTS

CivicAid - Civic Issue Reporting Platform

React, Tailwind CSS, Leaflet.js, Django REST Framework, PostgreSQL | 2025 - 2026

- **Architecture:** Architected separate, secure citizen and administrator dashboards from a single unified React codebase using role-based route guards to control conditional views.
- **API Integration:** Developed client-side JWT authentication utilizing Axios interceptors to execute silent token refreshes, maintaining persistent user sessions securely.
- **Data Engineering:** Built an interactive Leaflet.js heatmap to visualize local community issue density; resolved data rendering blocks by normalizing coordinate formatting mismatches (lat/long structures) between backend JSON payloads and frontend mapping configurations.
- **DevOps Workflow:** Established a multi-remote Git deployment pipeline making automated updates to Vercel upon merging staging code branches to main.

Nepal Insight Dashboard

React, Tailwind CSS v4, Leaflet.js, Recharts | 2025

- **Aggregation:** Created an analytics interface aggregating live updates from three external public data providers (USGS Seismic data, OpenAQ Air Quality, Nepal Census API), resolving variance across conflicting JSON schemas into a single internal state framework.
- **DOM Management:** Programmed a highly dynamic dark/light configuration utilizing a MutationObserver to listen for theme alterations, hot-swapping map tile layers seamlessly without triggering full page re-renders.
- **UI Design:** Rendered responsive data mapping markers scaling conditionally based on live event severity levels alongside unified interactive Recharts area graphs.

CashFlow - Personal Finance Tracker [Live Demo](#) shova10/Cashflow

React, Zustand, Recharts, Tailwind CSS | 2025

- **State Management:** Designed a lightweight local application utilizing Zustand for lightweight global store mechanics and synchronous browser localStorage pipelines to maintain clean user data durability across tabs.
- **Modularity:** Authored highly decoupled charting presentational elements passing generic structural datasets down to clean, reusable Recharts visualization layouts.
