PROFESSIONAL SUMMARY

Frontend developer with a focus on React and component-based architectures. Experienced in taking projects from technical design through to production deployment. Together with the team, I co-built CivicAid, a live reporting platform for civic issues with role-based dashboards, JWT authentication and a live, interactive Leaflet.js heatmap, hooked into a backend using a Django REST API. I'm very keen to join a product team.

SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS v4, Bootstrap, Vite, React Router v6

State & Data: React Hooks, Context API, Zustand, Axios & Interceptors, REST API Integration, localStorage

Data Visualization: Recharts (AreaChart, BarChart, PieChart), Leaflet.js / React-Leaflet, heatmaps, CircleMarkers

UI & Design: Responsive & Mobile-First Design, Dark/Light Theme Systems, WCAG Accessibility, Figma (Basic)

Backend (integration): Django REST Framework, JWT Authentication, PostgreSQL (Basic), SQL

Tools & Workflow: Git & GitHub, Dual-Remote Git Workflows, Vercel, Postman, Chrome DevTools, VS Code, Jira

Languages: JavaScript (ES6+), Python (Basic), Java (Academic) Soft Skills: Problem-solving & logical thinking, Team collaboration, Quick learner, Detail-oriented

PROJECTS

1. CivicAid - Civic Issue Reporting Platform | React.js · Django REST API · Leaflet.js · Vercel [Live](#) · [GitHub](#)

- Built the full frontend in React with role-based dashboards for citizens and admins each role sees a tailored interface with relevant actions and data.
- Developed an interactive Leaflet.js heatmap visualizing issue density by location; debugged coordinate serialization mismatches between Django serializers and the map renderer.
- Implemented JWT authentication flows, real-time status notifications, and an admin panel with filtering, sorting, and pagination via Axios interceptors.
- Configured a dual-remote Git workflow (frontend-dev branch) so every push simultaneously updates the team repo and the Vercel fork, enabling continuous deployment.

- Resolved Django URL routing conflicts and silent API fetch failures by tracing root causes across the full request-response cycle.

2. Nepal Insight Dashboard | React.js · Tailwind CSS v4 · Leaflet.js · Recharts · Vite [Live](#) · [GitHub](#)

- Built a single-page dashboard combining three open datasets USGS earthquake activity, OpenAQ air quality, and Nepal census population into one unified interface.
- Implemented an interactive React-Leaflet map with color-coded CircleMarkers scaled by earthquake magnitude and Recharts AreaCharts and BarCharts for AQI and population data.
- Engineered a light/dark theme system using a MutationObserver to sync Leaflet tile layers with React's theme state, including custom CSS overrides for dark-mode popup contrast.

3. CashFlow - Personal Finance Tracker | React · Zustand · Recharts · Tailwind CSS · Vite [Live](#) · [GitHub](#)

- Built a fully client-side personal finance tracker with Zustand for global state and localStorage persistence no backend required for a single-user tool.
- Visualizes monthly income vs. expense trends and category breakdowns using Recharts; dark UI designed with Tailwind CSS.

4. Personal Portfolio Website | React.js · Tailwind CSS v4 · Vite [Live](#) · [GitHub](#)

- Built a modular, component-driven portfolio in React with a centralized data config layer separating content from UI making updates instant without touching component code.
- Warm dark aesthetic with amber, teal, and rose accents; mobile-first responsive layout with custom CSS animations.

EDUCATION

Bachelor of Information Technology (BIT)

Expected 2026

Bhairahawa Multiple Campus, Tribhuvan University · Bhairahawa, Nepal

CERTIFICATE

- Responsive Web Design - freeCodeCamp
